PROFESSIONAL SUMMARY

Aspiring Data Analyst skilled in **SQL**, **Python**, **Power BI**, and **Excel**, with hands-on experience in data cleaning, EDA, and dashboard development. Built an end-to-end IPL analytics project on 150K+ deliveries and earned HackerRank SQL (Intermediate) certification. Passionate about turning raw data into clear, actionable insights.

EDUCATION

B.E. Computer Engineering | Mumbai University

2023 – 2026

Rajendra Mane College of Engineering & Technology, Ratnagiri

Diploma in Computer Engineering | MSBTE

2019 – 2021

JSPM Bhivrabai Sawant Polytechnic, Wagholi, Pune

WORK EXPERIENCE

Data Science Intern | Prodigy InfoTech (Remote)

July 2026

- Explored a global country dataset, visualizing distribution across region and income group to surface demographic patterns.
- Cleaned the Titanic dataset — imputed missing **Age** values using median imputation — then ran exploratory analysis on key survival-related features.
- Built a Decision Tree Classifier on a bank-marketing dataset using scikit-learn, encoding categorical features and evaluating model accuracy.
- Performed sentiment analysis on Twitter data, classifying posts by topic and sentiment to visualize trends.
- Analyzed **100K+** records from a U.S. traffic accident dataset, extracting time-based patterns to identify high-risk hours.

TECHNICAL SKILLS

- Programming & Databases:** Python, SQL, MySQL
- Data Analysis:** Pandas, NumPy, EDA, Data Cleaning, Statistical Analysis
- Data Visualization & BI:** Power BI, Excel, Matplotlib, Seaborn, Dashboard Development, Reporting
- Tools & Technologies:** Git, GitHub, Jupyter Notebook, MySQL Workbench

CERTIFICATIONS

- SQL (Intermediate)** — HackerRank
- Data Analysis with Python** — freeCodeCamp (300 hrs; Pandas, NumPy, Matplotlib, Seaborn)
- Introduction to Excel** — Microsoft
- Introduction to Data Visualization** — Alison

SELECTED PROJECTS

1) IPL Ball-by-Ball Data Analysis (Flagship Project) | *Python, Pandas, Seaborn*

Dec 2025

[GitHub ↗](#)

- Analyzed a **150K+** delivery dataset end-to-end, cleaning raw records and preserving valid non-dismissal rows.
- Built custom metrics such as strike rate and six-hitting frequency to compare batting styles beyond total runs.
- Documented the workflow and findings in a GitHub repository with a clear Key Insights section for non-technical review.

2) Google Play Store Market Analytics | *Python, SQL, Seaborn*

Feb 2026

[GitHub ↗](#)

- Loaded **10,000+** app records from CSV into SQLite with Python to support analysis.
- Cleaned inconsistent text fields with Pandas and analyzed category and pricing trends using SQL and Seaborn.
- Used the project to demonstrate data cleaning, querying, and visualization across a full analysis workflow.

3) Retail Store Sales Analytics | *SQL (MySQL)*

Apr 2026

[GitHub ↗](#)

- Wrote **150+** SQL queries across joins, aggregations, subqueries, and views against a retail sales schema.
- Used the exercise to demonstrate breadth in query writing from basic filtering to more advanced analysis patterns.
- Highlighted SQL practice that maps directly to common Data Analyst screening tests.

4) Power BI Dashboards | *Power BI, DAX, Power Query*

Mar 2026

[GitHub ↗](#)

- Olist E-commerce Dashboard:** built a 3-page report (Overview, Logistics, Customer) with custom DAX measures, including delivery-delay buckets.
- Chocolate Factory Dashboard:** analyzed sales and production data with interactive visuals and KPI tracking.
- Sales Performance Dashboard:** built on a Products/Sales/Stores star schema with a full calendar table for time intelligence.
